

Instructions for Bulk Tank Sample (TBC)

Freeze ice packs immediately upon receipt

1. Ensure that the ice packs are frozen.
2. Ensure the bulk milk is fully cooled and agitated prior to taking the sample.
3. Use only the sterile container provided for the sample.
4. When sampling, avoid any form of contamination to ensure accurate results.
5. Once taken, place the sample between the frozen ice packs and cover with bubble wrap.
6. Place in the cool box provided.
7. Replace in the cardboard box, and using the address label provided, please post first class back to us.
8. Please **do not** post on a Friday to prevent the sample/s being delayed over the weekend.

If you have any queries please call QMMS on 01749 871171.
